9	Navigate to Contact Me	Go to Contact Me	Success	Pass	
10	Contact Me Form	Sends Email	Success	Pass	Google Form - simple and thank you message responds

Comments: Adam, your website is awesome! I want to point out some of your successes in this. First, your font face, color scheme and overall feel of the website comes off as professional and polished. It's a seamless website that's comfortable and works easily. Next, your header is legible and minimalistic. Your HTML, CSS & JavaScript looks great, it's a great collaboration of all of your ideas. I love that your About section includes personal details about who you are, your family, and your experience. This helps to humanize you to your clients, it makes them realize you're a real person and worth hiring. I also really like the icons you used for HTML5, CSS, JavaScript & Node.js. Your portfolio icons are also good, they sum up what your work details and have a simple icon for easy navigation. Your development approach is a great extra touch. Overall, excellent work Adam!
